

CITY

**Dear Sir / Madam,**

The Bee City Association located in Tetovo, on 25 and 26 July 2019, in cooperation with the Municipality of Tetovo, organizes the Honey Festival under the slogan "Sweet days of Tetovo".

The honey festival intends to promote the capacities of the Polog region in production of honey, tradition, innovations in the field of honey production and treatment of honey and its by-products. The festival will be solemnly opened on 25th July 2019, at 11:00 am, in front of the Cultural Center in Tetovo.

The "Sweet Days of Tetovo" festival will take place for 2 days.

The festival aims to become traditional.

Within the festival there will also be:

### **BEE SHOW**

The "Sweet days of Tetovo" will be exhibition of all kinds of bee products exhibited by beekeepers, while visitors except being able to disclose honey products can be informed about the bees, honey, pollen, propolis, pollen and its products.

In addition, beekeepers will also be able to purchase various beekeeping tools that companies that deal with and produce and trade will exhibit their wide range of products.

On the other hand, many local and international institutions and organizations will have their information / stands to inform beekeepers about subsidies, financial assistance, development programs that are provided for the development of this very meaningful pattern for man's nature.

### **BEE ART SHOW**

Art presents an aesthetic reflection of the reality that surrounds us, but also of the sensational human imagination, but at the same time it gives strong messages to the citizen about the phenomena that surround us.

Our aim is, through the message of "BEE ART SHOW", to answer many questions related to the world of bees. There are thousands of questions like: What is a bee ?, How does it work ?, Its close connection to nature ?, Its contribution to fertilizing the fruit ?, Does the bee represent the rescuer of man ?, etc., etc.

All of these questions will be answered through the art where BEE ART SHOW will give a "Live" exhibition at the time of the honeymoon festival, where in the hives prepared by the Association / organizer, the artists involved in projects through lines and colors in front of the public will produce their works with concrete messages. In this part will be joined also children who with their imagination will teach us a lot about the bee, especially what adults often neglect

## BEE FRIENDLY GARDEN

Researchers have proved that planting flowers needed by bees can increase the diversity of bees, even within the urban areas in which many of us live.

Therefore, in the park reserved by the Municipality of Tetovo, on the first day of the Festival, participants and beekeepers plant bee-friendly bee plants in the park "BEE FRIENDLY GARDEN", which will also be the first park in Macedonia with this name which will be planted.

This event will be a multidimensional window that will increase green areas throughout our city and will be a descriptive point where not only within the public spaces, but also stimulate citizens to plant such flowers in their private gardens and balconies.

## LEARNING BEE

During the two days of the Festival, there are many important and interesting lectures about the bee and its way of handling it. University professors as well as professional beekeepers from Macedonia, Albania, Kosovo and Bosnia will know their knowledge through the lectures will try to broadcast it to all interested. The purpose of these lectures will be the awareness and training of beekeepers in the field of beekeeping. Hoping that you will respond positively to our request and will make us happy with your arrival.

Sincerely,

BEE CITY
