To the Chairman of the Agricultural Commission
Of the European Parliament
Mr. Neil Parish

Dear Mr. Neil Parish,

The Federation of the European Beekeeping Organizations - "Apislavia" would like to express its gratitude towards the initiative of the state of the Beekeeping Resolution. We are all in favor of the notes made regarding the beekeeping conditions. We would like to make the following additional suggestions that we find useful

- For paragraph five we think the following text should be added – the areas that are being protected from erosion plants such as Robinia, Tilia, Amorfa fruticosa, Corylus avellana, Salix, Aser, Betula alba, should be planted.
- For paragraph eleven the following text should be added – finding financial help during the winter feed of the bees.

On behalf of all the members of "Apislavia" – Bulgaria, Belarus, Hungary, Greece, Macedonia, Poland, Russia, Romania, Serbia, Slovakia, Turkey, Ukraine, Check Republic, and the Institute of "Apimondia" in Bucharest, we wish you a lot of success in all you endeavors and especially for the ones devoted to the progress of the beekeeping in Europe.

Eng. Stefan Stefanov

President of "Apislavia"
